

Who can help?

Landowner technical assistance in the Onslow Bight

A wide range of technical assistance is available to landowners to help with forest management. The first step is to have a resource professional visit your property and write a plan based on your objectives.

N.C. Forest Service

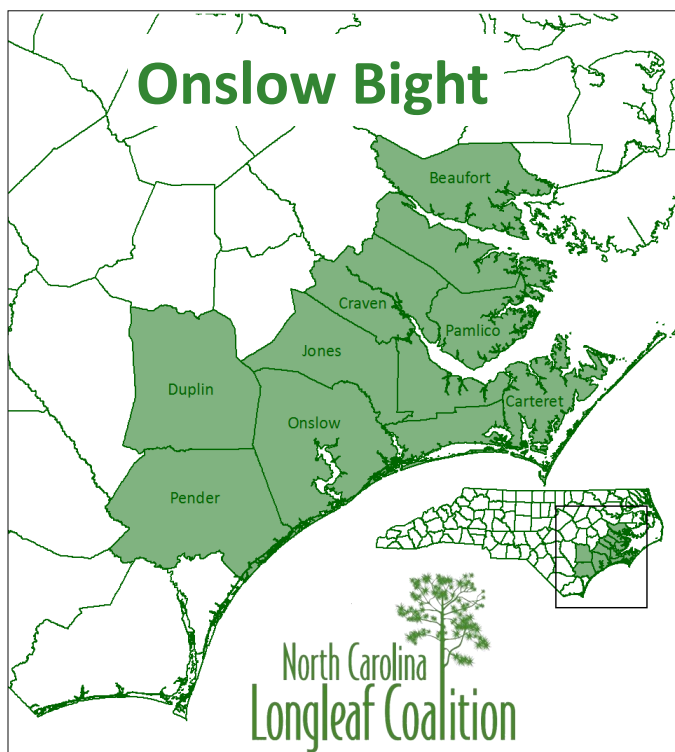

The county ranger is the key contact for services offered by the N.C. Forest Service (NCFS). Foresters and rangers can prepare woodland plans tailored to your management goals. Information about fees, if applicable, for woodland plan preparation are available at www.ncforestservice.gov.

The NCFS offers prescribed fire services, including site preparation burning, in-stand burning and fireline construction. Rates are based on acreage and equipment use.

Forest management on private lands

Consulting foresters provide services on a fee or contractual basis. While the N.C. Forest Service and other public agencies can provide some free advice and assistance for managing your forestland, there are limitations. If you wish to know the value of your timber or how much timber volume you have, a public agency staff person cannot provide this service. Forest owners are encouraged to obtain the services of a consulting forester. For a private lands resources, including contact information for consulting foresters and prescribed burning contractors, please visit: <https://www.nclongleaf.org/landowners.html>

U.S. Department of Agriculture

The Farm Service Agency (FSA) and Natural Resource Conservation Service (NRCS) provide a variety of cost share assistance programs for longleaf pine establishment and management.
